Theory Exam 2021.05.05.

Li Zhipeng (G31R6T) submitted May 5 at 10:20am

☐ Minimal File Table - it is the basic table of a minimal file system.

Incorrect

Question 11

0 / 1 pts

How the operating system grants the good mutual exclusion with the help of the semaphores?

☐ It grants the good mutual exclusion with the fact that this "variable" does not need common memory.

☐ It is granted by the feature that it is an atomic operation, it could not be interrupted.

☒ According to the POSIX standard we grant the good mutual exclusion with the usage of "volatile".

☐ It grants the good mutual exclusion with the fact that this modification on the
